v2.0	20.07.2022	9ine Privacy Academy Schedule	Mark Orchison

Welcome to 9ine!

Our Story

In 2009 Mark Orchison started 9ine from his kitchen table in Greenwich, London. Since then, Mark has led the business to become the leading independent K-12 technology and compliance consultancy in the UK and internationally.

In 2020 we launched our software application for our clients across the UK, Europe, Middle-East, Asia, South Africa and North America.

We pride ourselves on the investment in our staff and clients. Being owner managed, our culture and values are tied to our Founder & CEO, rather than the priorities of unknown shareholders.

We have grown to be globally recognised and respected. We have offices in the UK, India, Canada and Singapore.

Who are 9ine?

We are the leading education technology consultancy in compliance and security for schools. We specialise in providing technology and compliance solutions, working with a wide range of school types and sizes. Our clients trust us to guide them through their compliance obligations and support them in ensuring that their systems are safe and secure.

Our vision is to help your organisation by providing you with affordable, intelligent, and automated solutions to reduce the workload when managing compliance requirements. Protecting children from harm is front and centre of 9ine's solutions and services. Our technology is developed to aid schools in identifying risks of harm and in doing so, being able to react and mitigate those risks. The starting point for this is our technology, a SaaS App for data privacy and protection which enables you to quickly and efficiently manage your compliance.

Global partner to education

We work in partnership with organisations which represent almost 5000 schools, across 120 countries - 9ine are the partner of choice for not-for-profit associations and accreditation organisations for Independent and International Schools. We formally support:

- International Council Advancing Independent School Accreditation
- Council of International Schools
- Japan Council of International Schools
- Canadian Accredited Independent Schools
- Association of Waldorf Schools of North America
- Southern Association of Independent Schools
- British Schools in the Middle East
- Independent Schools' Bursars Association

And informally support:
- Association of National and Private Schools (ANPS), Indonesia
- International Schools Association Thailand
- Pennsylvania Association of Independent Schools
- California Association of Independent Schools

Sharing our knowledge and expertise

We place considerable emphasis and resources on advancing our understanding of privacy and cyber threats. This is made possible by our in-house privacy and cyber security research team, investing their time in the exploration of global privacy law to benefit the schools that we work with. Not only do our clients receive value from our extended investment in research, but we ensure all schools have the opportunity to benefit from our knowledge through our twice yearly Education Privacy & Technology publication. This is published, available free of charge and supported by a webinar program where some of the authors will discuss their topics, providing readers the opportunity to advance their understanding and learn more.

What our clients have to say!

"They felt like an extension of our IT support team for the time they were with us and were never judgemental on the approach we take with our systems and security. I'd have no concerns about recommending them (and using their services) again in the future." **Mike Ward, Head of I.T**
Case Study Available

"[9ine Senior Compliance Consultant] Andrew Cheung is like the Siri of Data Protection, you can ask him anything and he knows the answer and comes back to you almost instantaneously"
Rolly Maiquez, DPO & Technology Director

"I first met Mark Orchison at an ISBA Conference about 6 years ago and his knowledge of independent schools and technology stuck with me. Several years later when we wished to evaluate where we were with IT staffing, infrastructure and planning, he seemed an obvious person to turn to" **Catriona Thompson, Bursar**
Case Study Available

"It has been a true pleasure working with 9ine over the past year. We engaged them in an ongoing contract to continue to provide security auditing services, and our IT vendor has also appreciated the extra set of eyes on their work." **Mitch Mitchell, Advancement Director**
Case Study Available

"9ine was strongly recommended by other schools in the region who already had a business relationship with 9ine,"

Mike Kewelar, Director of Technology

Welcome to 9ine's Privacy Academy

9ine's 9 month privacy training programme returns in November 2022. This monthly professional development programme uses interactive sessions, group scenarios and provides supporting resources to engage, develop and grow your expertise in managing data privacy and protection in school.

We created the 9ine Privacy Academy as there is a notable absence of formal structured training for school privacy professionals with limited, if any, professional development that links a framework to the practical actions of managing privacy within the context of a school. And where there are courses that are applicable, the depth of detail is often absent. For this reason we have developed a training programme for education privacy teams to attend, learn, and leave with an instructional understanding of how to embed a culture of privacy in their school.

If you were to encounter a data breach, would you be confident that you or your colleagues could implement the correct procedures to ensure that the incident was handled appropriately, protecting the members of your school community?

How would you and your colleagues respond to a subject access request? Does your school have a grasp on how personal data is being shared with third parties? Where international transfers of personal data are occurring, what are the risks?

If your answers are "I'm not sure" then it's time to start thinking about professional development for your data protection team to get your compliance programme back on track!

The 9ine Privacy Academy is an affordable professional development course that gives your team applicable training from our in-house data protection experts, including resources and interactive learning through participant experiences and plenty of time for questions.

Privacy Academy course schedule

Course Schedule			
*Date/Time	**Course Status**	**Academy Course Title**	**Description**
November 2nd 2022 08:30 am UK	Live session pending	Leadership & Governance	Course covering accountability and evidencing compliance in a structured privacy programme. Includes case studies and real world examples.
